

Pneumatic Free Roller Set

Description

The pneumatic free roller set is specifically used for the automatic test process of speedometer tester and roller brake tester for the tandem-axle vehicles.

KZG-15

Features

- ▶ Extra-strong structure roller set.
- ▶ Pneumatic lock of roller design.
- ▶ The rollers are coated with special techniques to prevent slippage between the tires of the vehicle and the surface of roller.
- ▶ Quantity of rollers can be tailored to assist speedometer in testing vehicles with different wheel base.
- ▶ The use of pneumatic FRL ensures that the pneumatic components work well and are well-protected.

Technical data

Item	KZG-15
Item No.	01.02.09.0001
Max. axle weight	15000 kg
Roller dimensions	190×1100 mm
Equipment dimension	3400×950×360 mm
Roller's quantity	3 sets
Air supply	0.7-0.8 MPa
Power supply	AC 220V, 50Hz,ground
Max rolling speed	> 90 km/h
